ABOUT CLADMART

Modern Exterior Cladding, Made Clear.

CladMart supplies coordinated composite siding products for modern exterior applications. Our fluted panels and flat siding are available in matching wood-look finishes, long-length options, and compatible accessories to make exterior cladding projects easier to plan and complete with clarity.

- | | | | |
|-----------|---|-----------|---|
| 01 | Two coordinated profiles
Fluted panels and flat composite siding. | 02 | Six wood-look finishes
Shared across both product profiles. |
| 03 | 12 ft and 16 ft lengths
For cleaner layouts and fewer unnecessary joints. | 04 | Matching accessories
Trims and clips designed around the siding system. |

COORDINATED PROFILES. SHARED FINISHES.

THE CLADMART PRODUCT SYSTEM

Fluted Panels

Depth, rhythm, and architectural definition.

A dimensional linear profile that creates shadow, texture, and visual movement across modern exterior surfaces. Available in coordinated wood-look finishes and long-length options for cleaner layouts.

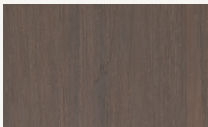

IDEAL FOR

- 01 Feature walls
- 02 Entrances
- 03 Soffits
- 04 Facade accents
- 05 Full elevations

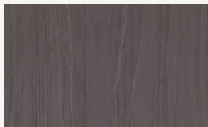

COORDINATED ACROSS BOTH PROFILES

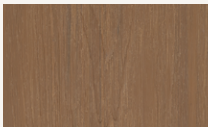

Blackwood

Dark Walnut

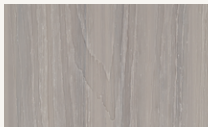

Rosewood

Golden Teak

Creamy Cedar

Vintage Grey

Finish appearance may vary by profile, lighting, screen, and production batch.
Review physical samples before final selection.

COORDINATED PROFILES. SHARED FINISHES.

IDEAL FOR

- 01 Exterior walls
- 02 Soffits
- 03 Entrances
- 04 Feature areas
- 05 Mixed-profile designs

THE CLADMART PRODUCT SYSTEM

Flat Composite Siding

Clean lines with a refined wood-look surface.

A tongue-and-groove profile designed for continuous, streamlined exterior surfaces. Available in coordinated wood-look finishes and long-length options, it can be used on its own or paired with fluted panels for a unified exterior system.

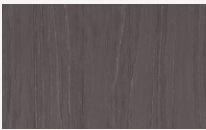

COORDINATED ACROSS BOTH PROFILES

Blackwood

Dark Walnut

Rosewood

Golden Teak

Creamy Cedar

Vintage Grey

Finish appearance may vary by profile, lighting, screen, and production batch.
Review physical samples before final selection.

Built Beyond the Surface

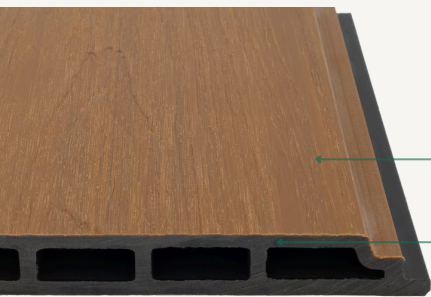

CladMart composite siding combines a durable composite core with a protective co-extruded surface. Together, these layers support exterior performance while creating a refined wood-look finish with depth and texture.

01

A Protected Outer Layer

A protective surface layer is formed together with the composite core during manufacturing. This outer layer helps reduce moisture absorption and supports resistance to staining, splitting, fading, and everyday exterior wear.

Protective Co-Extruded Surface

Composite Structural Core

02

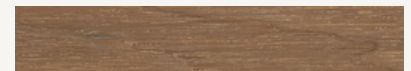

A More Natural Wood-Look Finish

The surface is embossed with a deeper wood-grain pattern to create more natural visual variation and tactile depth. The texture adds character while helping the material maintain a refined appearance over time.

3D Embossed Texture

CladMart surface

Standard Embossed Texture

Standard composite surface

01

Low Maintenance

Designed for easier routine care than natural wood.

02

Moisture Resistant

Composite construction and a protected surface help limit water absorption.

03

Fade & Stain Resistance

Designed to retain its appearance when installed and maintained correctly.

04

Exterior Durability

Made for long-term exterior applications and changing weather conditions.

Technical details are available in the CladMart Product Specifications.

Six Coordinated Wood-Look Finishes

Each finish is available across both fluted panels and flat composite siding, allowing profiles to coordinate across one exterior while creating different levels of depth, texture, and visual rhythm.

01 Blackwood

Deep charcoal-black with subtle wood-grain variation.

Flat Siding

Fluted Panel

02 Dark Walnut

A dark brown finish with warm, natural depth.

Flat Siding

Fluted Panel

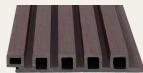

03 Rosewood

A rich brown-grey tone with a refined contemporary character.

Flat Siding

Fluted Panel

04 Golden Teak

A warm medium wood tone with golden undertones.

Flat Siding

Fluted Panel

05 Creamy Cedar

A light, soft wood finish with a clean natural appearance.

Flat Siding

Fluted Panel

06 Vintage Grey

A cool grey wood tone suited to modern neutral palettes.

Flat Siding

Fluted Panel

Choose With Confidence

Screen display, lighting, profile shape, installation direction, and production variation may affect how a finish appears. Review physical samples in the project environment before making a final selection.

Physical samples are available from **CladMart**.

Designed as a Complete System

CladMart profiles are supported by coordinated trims and clips that help create cleaner edges, corners, transitions, and installation details across exterior applications.

PROFILES. TRIMS. CLIPS.

01

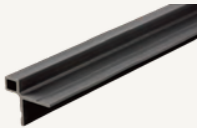

Fluted Panel System

Coordinated components for panel terminations, outside corners, and concealed fastening.

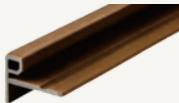

Fluted Panel

Textured profile for visual depth and shadow.

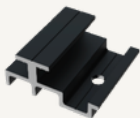

End Trim

Creates a clean finished edge at panel terminations.

Corner Trim

Supports a refined outside-corner transition.

Aluminum Clips

Concealed fastening components for secure installation.

02

Flat Composite Siding System

Matching components for clean perimeter details and secure installation.

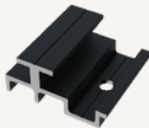

Flat Composite Siding

Smooth, flat profile for a clean and modern wood-look surface.

L-Trim

Supports clean perimeter edges and selected return details.

Aluminum Clips

Concealed fastening components for secure installation.

01

Plan the edges

Identify terminations, corners, and transitions before ordering.

02

Coordinate quantities

Include trims and clips in the material takeoff, not only the siding boards.

03

Follow the guide

Refer to the CladMart Installation Guide for fastening, spacing, substrate, and installation requirements.

Detailed installation instructions are available in the CladMart Installation Guide.

Built to Secure the Profile. Designed to Allow Movement.

CladMart uses an engineered concealed clip system that helps the siding accommodate normal expansion and contraction.

Composite siding naturally expands and contracts as temperatures change. The fastening system and required expansion conditions work together to support long-term installation performance and a clean, consistent finish.

RIGID DIRECT FASTENING

Face-screwing through the siding fixes the profile rigidly to the wall assembly.

Direct fastening can restrict normal material movement when the profile is fixed rigidly to the wall assembly.

CLADMART CONCEALED CLIP SYSTEM

The aluminum clip secures the profile without relying on visible face-fastening through the siding.

The clip allows the siding to move naturally with temperature changes while remaining securely fastened.

01

Accommodates Movement

Allows the cladding system to respond to normal thermal expansion and contraction.

02

Concealed Fastening

Fasteners remain behind the finished profile rather than penetrating the visible siding face.

03

Cleaner Finished Surface

No rows of exposed face screws interrupting the wood-look finish.

Designed for Changing Exterior Conditions.

Temperature swings cause composite siding to expand and contract. CladMart's concealed clip system, combined with required expansion space at ends, transitions, and penetrations, helps the installation accommodate this movement for long-term performance.

Engineered for Canadian climates.

Proper installation, including maintaining required gaps and using CladMart clips and trims, is essential. Follow the CladMart Installation Guide for full details.

WHY CLADMART

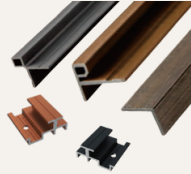

A Better Way to Plan Modern Exterior Cladding

CladMart brings profiles, finishes, accessories, and product guidance together in one coordinated system, helping buyers move from material selection to project planning with greater clarity.

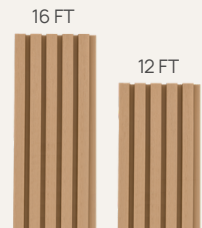

01 Coordinated Product System

Fluted panels, flat siding, matching finishes, and compatible accessories designed to work together.

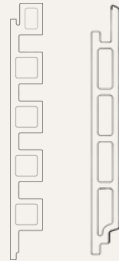

02 Long-Length Options

Available in 12 ft and 16 ft lengths to support cleaner layouts and reduce unnecessary joints.

03 Consistent, Refined Profiles

Consistent profile geometry supports cleaner lines and a more polished installed appearance.

04 Natural Wood-Look Finishes

Six embossed finishes designed to bring warmth, depth, and architectural character to exterior surfaces.

05 Built for Exterior Applications

Co-extruded composite construction supports moisture resistance, durability, and easier ongoing care.

06 Samples & Project Support

Review finishes, compare profiles, access product information, and request project pricing before ordering.

Modern Exterior Cladding, Made Clear.

From first sample to final material selection, CladMart helps simplify the decisions around profiles, finishes, accessories, and project quantities.

Samples, specifications, and pricing support are available from CladMart.

See the Finish Before You Specify

Review colour, texture, profile depth, and scale in person before making a final selection. CladMart samples and product resources help support clearer decisions from early planning through ordering.

01

Choose a Profile

Compare fluted panels and flat composite siding.
